

CreativeMED Project Conference

MEDITERRANEAN CREATIVITY AND INNOVATION: TRANSFORMING REGIONAL POLICY

AMPHITHEATRON OF ACROPOLIS MUSEUM - ATHENS

10th April 2014 09:00 – 17:30

Brief. The CreativeMED project, capitalising five successful projects of the MED programme 2007-2013, aims to deliver a bottom-up smart specialisation framework leveraging the creativity and innovation potential of the Mediterranean “spirit” (such as cultural traditions and identities, openness and willingness of people to network and share, capacity to integrate technical with social innovation etc.). This conference is the first public event whereby the specific aspects of the framework are presented and validated against a number of regional smart specialisation strategies currently in preparation. The ultimate goal is to identify, trace and convey alternative innovation models, which create economic value by using culture-based dynamics.

09.00 Registration of participants

09:30 Opening session

Moderated by George Assonitis, Union of Hellenic Chambers
